## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

This is a divisional application of application SN 09/719,975 which was issued allowance by the examiner on August 25, 2003, however, was abandoned. The instant claims share the same allowable subject matter as the allowed claims in the parent application, thus, the instant claims are also allowable for the same reason which is rephrased as the following.

The instant claims are directed to a process for preparation of linear, alternating copolymers of carbon monoxide and olefinically unsaturated compounds in the presence of a catalyst composition comprising a nitrogen- or phosphorus-bidentate ligand containing transition metal complex, wherein each of the substituents on the phosphorus or nitrogen containing at least one polar protic or ionic functional group.

Cooley et al. (US 5,830,989) teaches a 1,3-bis(di-o-methoxyphenyl)phosphino)propane ligand containing Group VIII transition metal complex. However, Cooley does not teach or reasonably suggest the bidentate ligand containing polar protic or ionic functional group.

Verspui teaches the formation of alternating copolymers of ethylene and carbon monoxide in the presence of a catalyst of a bidentate complex containing [1,3-bis(di-m- $\text{SO}_3\text{Na}$ -phenyl)phosphinopropane]palladium(II). However, Verspui's  $\text{SO}_3\text{Na}$ -phenyl substituent on phosphorus does not meet the limitations of  $R^1$  to  $R^4$  of the instant claims which limited the hydrocarbon group to be alkyl, cycloalkyl and alkylaryl groups, and

Verspui does not teach nor suggest the hydrocarbon substituent on phosphorus to be alkyl, cycloalkyl and alkylaryl groups.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
